

Kömmerling®

TODAY FOR TOMORROW

FRESH, HEALTHY AIR TOTALLY AUTOMATICALLY

**Kömmerling 88 centre seal
REGEL-air**

THE VENTILATION SOLUTION WITH A FRESH EFFECT

Kömmerling 88 centre seal
REGEL-air

SUSTAINABLE

- Minimises high air humidity and the risk of mould
- Protects the building fabric
- Fully automated in its work, totally without electricity

HIGH-CAPACITY

- Two-stage wind pressure regulation and innovative return spring for healthy flat air
- Invisible from indoors and outdoors when the window is closed, because it is integrated into the outer frame rebate
- Tightness against driving rain and passage of air as per DIN and EU standards
- Ventilation as per DIN 1946-6 and DIN 18017-3

USER-FRIENDLY

- Can be installed vertically and horizontally
- Ensures a constant, even supply of fresh air
- Easy to retrofit
- Easy to clean
- Also ideal for holiday flats and weekend homes

How about a ventilation system that ensures a healthy indoor climate? A solution that also ensures minimal heat loss? And which you can integrate quite elegantly into your Kömmerling series 88 centre seal windows? Or to put it another way: How about the Kömmerling 88 centre seal **REGEL-air**? This system ventilates totally automatically – even when the window is closed and without any active intervention. This is not only exceptionally user-friendly and sustainable, but also protects the building fabric of your property. It's that easy to give your Kömmerling window even more power.
